

1. Create an array of Customer objects and print all those customers whose monthly income is greater than 5lac per annum. Create your own Functional Interface and implement it.
2. Use the same interface to print all those customers whose age is in range of 18 to 25.
3. Create an array of Loan class objects and print all those Loan accounts whose status is 'Active' and whose EMI is pending. Use the 'Predicate' Functional Interface to achieve the same.
